

Clinical Note

Patient Name: Robert Williams
Date of Birth: 1972-11-08
Date of Note: November 18, 2025

Diagnosis & Disease Status

Primary Diagnosis: Prostate cancer
ICD-10 Code: C61
Disease Stage: Advanced/Metastatic (Note: Assumed, rising PSA with ADT)
Performance Status: ECOG 1

Clinical History

Prior Therapies:

- Androgen deprivation therapy (ADT)

Current Line of Therapy:

- Second-line

Medication History:

- ADT

Biomarker & Laboratory Results

Biomarker / Test	Result	Comments
Testosterone	<50 ng/dL	Castrate from ADT
PSA	Rising	Disease progression

Assessment & Plan

Assessment:
Patient with advanced/metastatic prostate cancer, currently on Androgen Deprivation Therapy (ADT). Laboratory results indicate disease progression with rising PSA despite maintaining castrate testosterone levels (<50 ng/dL), consistent with castration-resistant prostate cancer (CRPC).

Treatment Plan:

- Planned Treatment:** Enzalutamide

Insurance Information

Provider: BlueCross

Policy ID: INS11223

Coverage Period: 2024-06-01 to 2025-05-31

Eligibility Status: ACTIVE
